

**Why do we
need climate
action now?**

Our understanding of the science is not new. The connection to our Catholic faith is not new. The availability of solutions, for the most part, is not new.
We need to act.

What
are we
facing?

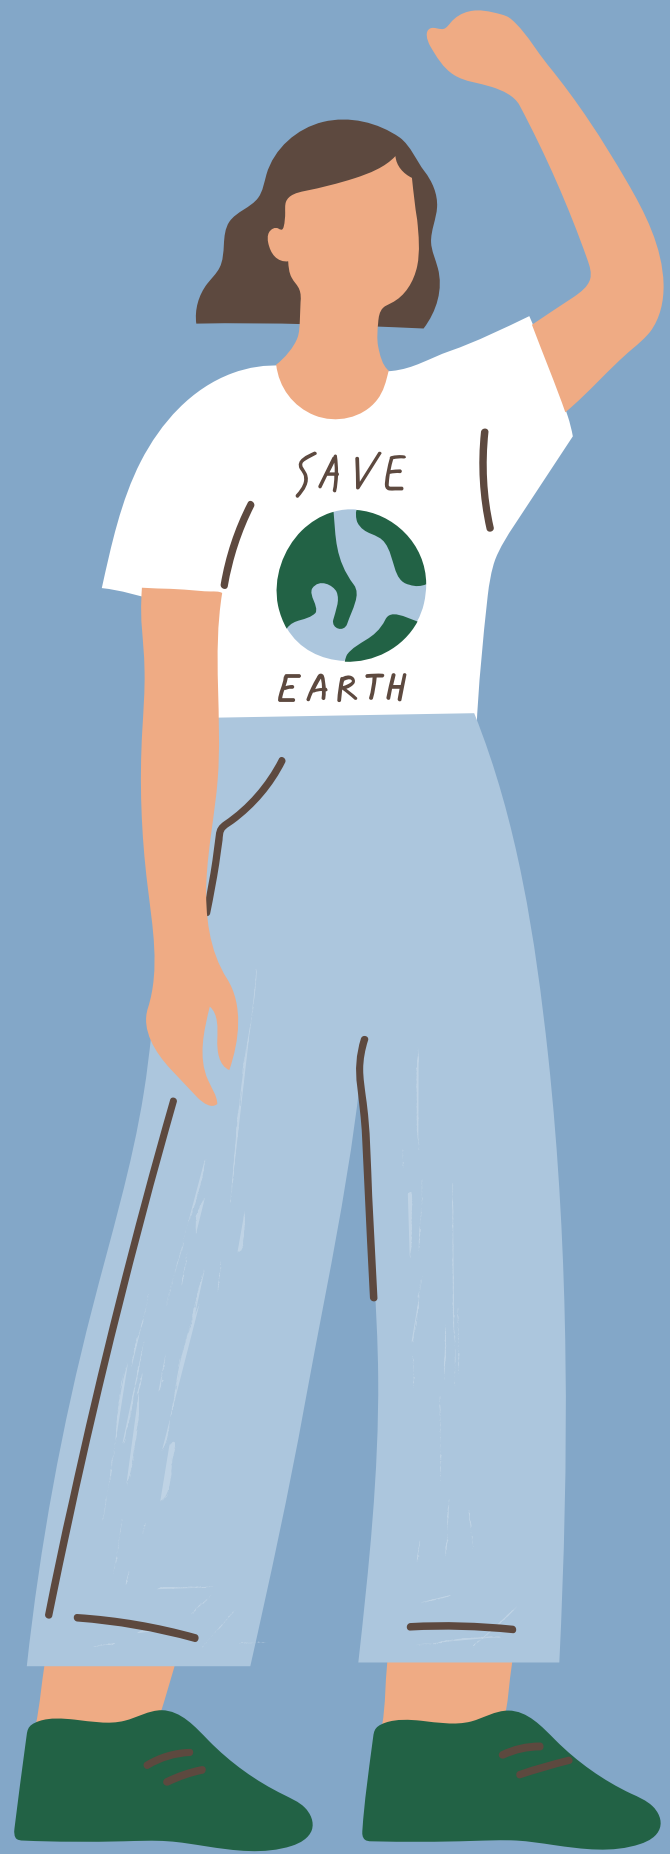

More frequent
and severe
natural
disasters

Food/water
scarcities,
migrant and
refugee crises

Civilization
and
ecosystem
collapse

REAL
CLIMATE
ACTION
NOW!

“The cumulative scientific evidence is unequivocal: Climate change is a threat to human well-being and planetary health. Any further delay in concerted anticipatory global action on adaptation and mitigation will miss **a brief and rapidly closing window of opportunity** to secure a livable and sustainable future for all.”

(IPCC Working Group II report, Feb. 28, 2022).

"The window of time to act might be closing, but so long as our hearts remain open, there is hope."

(Blog post by Emily Burke and Henry Glynn)

This is why climate investments **now** are so critical. For our planet, our youth, future generations, and our sisters and brothers.

"What need does
the earth have of
us?"

(Laudato Si', 160).
